

Drapes

- Tracks or poles should be fitted before taking your measurements.
- The track or pole must extend beyond the window at either side. This allows the drapes to be pulled back fully.

MEASURING WIDTH AND LENGTH

- Measure the width of the curtain track (diagram A) or pole between the finials (diagram B). If the track overlaps in the middle then add the length of the overlap (diagram C).

A Curtain track

B Curtain pole

C Track overlap

The length of the curtains can be either to the window sill, below the window sill or to the floor. Please ensure that you make allowances.

FOR EXAMPLE

1cm above the sill for sill length, the required length for below the sill, and 1cm above the floor for floor length.

EYELETS

- For eyelet drapes measure from the top of the pole to finished drop then add 4cm. Double fullness is required.

TAB TOPS

- For tab top drapes measure from the top of the pole. We recommend you attach your pole 15cm above the window to minimise light exposure. 1 1/2 times fullness is required.

PINCH PLEATS AND GOBLETS

- We recommend the use of a pole not a track to ensure the pleats hang correctly.

Roman Blinds

- First you must decide whether you require the blinds to sit inside or outside the window recess.

INSIDE WINDOW RECESS

- Measure length from the top to the bottom of the window recess.
- When measuring the width of the recess take a measurement at the top, middle and bottom and take a note of the lowest measurement. This ensures that the blind will not snag when in use (diagram D).

OUTSIDE WINDOW RECESS

- For length size, measure from the required position above the window down to the length required.
- For width size measure the width of the window and add approximately 4in (10.2cm) at each side of the window to allow an overlap (diagram E).

D

E

Valances

- Measure the length of the valance track plus the length of both returns (diagram F).

F Valances

Tips for measuring

- Always use a metal tape measure.
- Please state clearly whether your measurements are in centimetres or inches.
- We suggest you check all measurements are correct before you place your order.

We strongly recommend that you use the services of your retailer to dress and fit your drapes professionally.
